Invention Title	A COMPUTER/MOBILE APPLICATION TO STORE AND COMMUNICATE LIVE LOCATION EVIDENCE/ INFORMATION
Publication Number	32/2021
Publication Date	06/08/2021
Publication Type	INA
Application Number	202111031547
Application Filing Date	14/07/2021
Priority Number	
Priority Country	
Priority Date	
Field Of Invention	COMMUNICATION
Classification (IPC)	H04L0029060000, H04W0004029000, G06Q0030020000, H04W0004060000, H04W0064000000

Abstract:

The basic idea behind the proposed computer/ mobile application is to prevent the loss of information. In a particular incidence at a particular location the audience viewers know the maximum about the incidence. Maximum information about an incident can be collected at the time of happening. With the passage of time view get dispersed and due to memory limitations, some crucial information gets lost. In the proposed application, viewers can store the live information of an incident at any location. The application can provide access to the users to login from the account and store the information at the live GPS coordinates, which further can be access other users or by the related authority. In the present available application, the information can be traveling only among the known groups. In the proposed applicat important general information can be used by the common users. Security feature enables the privacy of users.

Complete Specification

Claims:WE CLAIMS

- 1) The basic idea behind the proposed computer/ mobile application is to prevent the loss of information. In a particular incidence at a particular location the auc the viewers know the maximum about the incidence. Maximum information about an incident can be collected at the time of happening. With the passage of time get dispersed and due to memory limitations, some crucial information gets lost. In the proposed application, viewers can store the live information of an incident i GPS location. The application can provide access to the users to login from the account and store the information at the live GPS coordinates, which further can be by the other users or by the related authority. In the present available application, the information can be traveling only among the known groups. In the proposed application, important general information can be used by the common users. Security feature enables the privacy of users.
- 2) According to claim1# the invention is to provide a basic idea behind the proposed computer/ mobile application is to prevent the loss of information. In a parti incidence at a particular location the audience or the viewers know the maximum about the incidence.
- 3) According to claim1,2# the invention is to provide a Maximum information about an incident can be collected at the time of happening. With the passage of tin viewers get dispersed and due to memory limitations, some crucial information gets lost.
- 4) According to claim1,2,3# the invention is to provide a store the live information of an incident at any GPS location. The application can provide access to the us login from the account and store the information at the live GPS coordinates, which further can be accessed by the other users or by the related authority.
- 5) According to claim1,2,4# the invention is to provide the information can be traveling only among the known groups. In the proposed application, important ger information can be used by the common users. Security feature enables the privacy of users.
