## Medical Coding – Advanced

**Venue:** VEDA LAB 505 | **Duration:** 32 Hrs (15th January 2020 to 22nd April 2020)

The training provided students an insight into the world of medical billing and coding through a specialty approach. This course is designed for B.Pharm (8<sup>th</sup> Semester) students who are new to the medical field, interested in becoming a certified medical biller and coder and/or entry level medical haematology billers and coders. The course included specialty related key terms along with visually appealing lectures.

It was organised by the School of Pharmaceutical and Population Health Informatics, the coordinator for the training was **Dr. Uddipak Rai (Associate Professor, SoPPHI-DIT University)**.

### Course Description:

This course provided the students an insight into the world of medical billing and coding through a specialty approach. It was designed for individuals new to the medical field, individuals interested in becoming a certified medical biller and coder and/or entry level medical hematology billers and coders. The course includes specialty related key terms along with visually appealing lectures. Additionally, the student's understanding of the course material was assessed through practice exercises, case studies, quizzes and a final exam.

### Intended for:

- Students who are interested in a career as a medical biller and coder
- Entry level medical hematology coders
- Experienced medical coders seeking a position in medical hematology
- Practice consultants who are unfamiliar with the medical billing and coding process

Registrar  
DIT University, Dehradun

**Course Objective:**

Medical coding is the first step of the medical billing process. Right coding leads to unambiguous billing process sufficing the needs of both service provider as well as the claimer. Healthcare system has a huge array of procedures, treatments, services and products made available to the patient's. This makes accurate medical coding process even more important and therefore necessitates the need of skilled and proficient medical coders.

**Programme Structure:**

**Module 1:** Introduction to Medical Coding

**Module 2:** Basics of Anatomy and Physiology

**Module 3:** Medical Coding and terminologies in association with Diseases

**Module 4:** : International Classification of Diseases (ICD)

**Module 5:** Healthcare Common Procedure Coding System (HCPCS)

**Module 6:** Current Procedural Terminology (CPT)

**Module 7:** Modifiers

**Module 8:** Evaluation and Management Guidelines for Medical coding professionals

**Module 9:** Radiology and Anaesthesia Guidelines for Medical coding professionals

**Module 10:** Surgery Guidelines for Medical coding professionals

**Module 11:** Pathology and Laboratory and Medicine Services and Procedures Guidelines for Medical coding professionals

**Module 12:** Health Insurance Portability and Accountability Act (HIPAA)

**Module 13:** Case Studies

**Programme Deliverables**

A comprehensive study material for all the modules in hard copies ensuring the needs of the audience. The accompanying training material is appropriately aligned with the current Industry's expectations.

Registrar  
DIT University, Dehradun

- Assignments for all the programme modules for continuous evaluation and guidance.
- Interactive or online live sessions on all key areas of the programme giving all flexibility to the participants.
- Online classes for all the modules will be conducted on the weekends. Moreover, a doubt clearing session will also be scheduled before the examination.
- All the efforts are made by IGMPI faculty members to make the entire programme modules easily understandable.
- Assessment and evaluation for all the programme modules in order to enhance the levels of competencies and skills of the participants leading towards the objective of application in the job.
- At the end of each programme modules, the trainers shall obtain feedback from the participants using specially designed questionnaires.
- All learning and training delivery initiatives shall be conducted in English.

#### **Future Prospects of Training in Medical Coding**

Through the programme, aspirants gain good knowledge of medical coding industry leading to availability of best employment options. Medical coders use electronic data today to keep track of patient records easier, but there are still some medical offices that use paper filing. Medical Coders convert patient health information into alpha numeric codes. Law firms hire medical coders to investigate fraud claims. Also, Government agencies provide the opportunity to medical coders to work on projects that affect healthcare across the nation. Medical coders are seen in every type of Pharma and healthcare industry from clinics, to hospitals, insurance companies, diagnostic centres, and legal centres addressing health or life insurance issues and many more where they work as Drug Safety Experts, Maintenance manager, Quality analyst, Medical coder, Associate content analyst etc.
