Site Planning VAT-90

The Site Planning Training was conducted for students of B.Arch- 3rd & 4th year program, the venue for the training was DIT University, SoAD Architectural Studio, it was conducted by the School of Architecture, Planning and Design, on **22-10-20219 to 08-11-2019** from 09:00 AM to 12:00 PM and the main speaker for the training was **Ar.Akshay Kaul**.

OBJECTIVE:

Site Planning is the art of arranging structures on the land and shaping the spaces between, an art linked to architecture, engineering, landscape architecture, and city planning.

The students will learn about utilisation of land and the details of surrounding area.

It also focuses on enclosure between different buildings, built and open space relationships and analysis of natural layers. Management of waste disposal, site utilities such as drainage , electricity distribution , fire fighting equipments ,rain water harvesting etc all forms part of a site plan.

REQUIRED SKILLSET FOR SITE PLANNING

Site Plan is prepared by Site Analysis and planning

Registrar
DIT University, Dehradun

Students must have the basic idea about the following :

- Natural layers
- Basics of GIS or Global Mapper software which helps in generating Data
- A brief idea about Planning Practices and landscape techniques
- Some Knowledge of plant species
- Existing buildings

Career Development Centre

TRAINING

OUTLINE:

The Site Planning training is divided into three modules

Module 1

- Introduction to Site planning and Kevin Lynch's site planning principles
- Introduction to Natural Layer Analysis including Topography , hydrology , vegetation analysis , Climate Analysis , visual analysis , aspects etc.

Module 2

- Basics of GIS Software and Data generation on the same
- Analysis and Interpretation of Data

Module 3

- Using the data to learn different Landscape design strategies
- Learning various landscape techniques and planning policies for best design solutions.

We use lectures, seminars and group tutorials to deliver the modules on the course.

Key learning:

- Zoning and other regulatory matters are always the most important aspects to be considered in Site Planning.
- On-site utilities or town services must also be considered along with the governing regulations.
- Management of on-site waste disposal is also an important aspect along with accessibility.
- Maintaining Site gradient slopes for drainage of water.

Training Outcomes:

By gaining the site planning knowledge, students will benefit in the following ways

- They will take right decisions with respect to placement of building blocks on site. Thorough analysis of watersheds , vegetation , slopes etc will result in better design solutions.
- It will have positive impact on environment and cause less damage in the long run.
