SDG 17

The advancement of the society in this age is only possible with mutual cooperation, collaboration, extending help to each section of the society and sharing of resources. The efficiency of achieving the SDGs become more while working in collaboration than an individual. This is true whether it is applicable for a person or an organization or a country. Wastage of resources must be zero and at the same time abundant resources must be generously shared with those not having access. This mutual cooperation is the fundamental principle of sustainability with involvement and participation of all. UN SDG17 aims to revitalize the global partnership for sustainable development. In line with UN SDG principle DIT University firmly believes in collaboration be it in research or resource sharing or implementation of its work culture not only inclusive but exclusive of University premises. The supportive and flexible work culture of DIT University essentially lies on the proposition of trust-integrity, employee engagement-opportunities, respect-fairness.

Aasraa has a vision of life with dignity for all underprivileged children. The cycle of poverty which rules their existence needs to be broken. Aasraa believes that the outside intervention needed to break this cycle is education and vocational training combined with health care, nutrition, clothing & shelter homes.

Subscribing to many of the 17 Sustainable Development Goals (SDGs) of the 2030 Agenda for Sustainable Development (No Poverty, Zero Hunger, Good Health and Wellbeing and Quality Education), the Aasraa Trust has been working towards empowering children from the streets and slums of Dehradun through education, vocational training, nutrition, health care and shelter. The vision of Aasraa is that there is no unreachable or unteachable child.

With the formation of Uttarakhand state, the capital city of Dehradun has seen large scale migration of people from the neighboring states. In addition, the rate of migration from the hilly areas of the state has also rapidly increased due to the decline in agricultural growth.
