SDG 17

DIT University Event Report 2022-23

The advancement of the society in this age is only possible with mutual cooperation, collaboration, extending help to each section of the society and sharing of resources. The efficiency of achieving the SDGs become more while working in collaboration than an individual. This is true whether it is applicable for a person or an organization or a country. Wastage of resources must be zero and at the same time abundant resources must be generously shared with those not having access. This mutual cooperation is the fundamental principle of sustainability with involvement and participation of all. UN SDG17 aims to revitalize the global partnership for sustainable development. In line with UN SDG principle DIT University firmly believes in collaboration be it in research or resource sharing or implementation of its work culture not only inclusive but exclusive of University premises. The supportive and flexible work culture of DIT University essentially lies on the proposition of trust-integrity, employee engagement-opportunities, respect-fairness.

University's Educational Initiatives to offer courses: Departmental Electives and Open Electives on Sustainability Issues

DIT University believes that United Nations' sustainable development Goals (SDGs) are not only guiding principles for society but have to be implemented through education, research, technology innovation and execution at ground level. For this, the students are the best flag bearers and when they will learn the topics through various courses and do hands on training on various aspects of SDGs they will be able to understand its importance and will carry the inner message after passing out and implement effectively same in society through their career path and doable actions.

In order to that, DIT University implement various courses on SDGs through its undergraduate programs which are offered as departmental electives or across university electives or core courses under fully flexible choice based credit system (FFCBCS). These courses include topics not limited to hands on training on pollution measurement, policy framework analysis, impact identification, technology aspects, challenges and mitigations in SDGs related functioning.

DIT University also offers full time undergraduate and postgraduate course on Pharmacy and related disciplines which is related to SDG 3.
