

The advancement of the society in this age is only possible with mutual cooperation, collaboration, extending help to each section of the society and sharing of resources. The efficiency of achieving the SDGs become more while working in collaboration than an individual. This is true whether it is applicable for a person or an organization or a country. Wastage of resources must be zero and at the same time abundant resources must be generously shared with those not having access. This mutual cooperation is the fundamental principle of sustainability with involvement and participation of all. UN SDG17 aims to revitalize the global partnership for sustainable development. In line with UN SDG principle DIT University firmly believes in collaboration be it in research or resource sharing or implementation of its work culture not only inclusive but exclusive of University premises. The supportive and flexible work culture of DIT University essentially lies on the proposition of trust-integrity, employee engagement-opportunities, respect-fairness.

DIT University Event Report

University's Engagement in International Forum

DIT University promotes its faculty members to participate in national and international conferences which address various issues at national and global level focusing on environment, economics and society. Also, University facilitates faculty members to take professional membership of national and international bodies which directly deal with seventeen sustainable development goals, its planning, measuring and implementation. Faculty members are also encouraged to take professional courses accredited by international agencies that address cross cutting issues on sustainability.

As evidence, the participation or course completion certificates and membership certificates are provided below.
