

ANNUAL STUDENTS SOCIETIES FUNCTION

There's more to the college experience than your classroom. Joining a club or an organization simply opens a lot of doors for opportunities as well as resources. It helps the students establish a community, learn and excel in new things, build their resume and so much more than just that.

Keeping the interests of its students in mind, DIT University not once has failed to put its best foot forward in providing the students a huge area of extracurricular activities in the form of various clubs and organizations, most of which have been founded by the students itself, for their consistent growth and development. And to

address their hardwork and achievements, Annual Student Societies' Function (ASSF) is organized every year by the university, where various clubs come talk about their growth, events managed by them and the developments that they've made in the past one year.

And like every year, this year as well around 35 clubs came up with their presentations and were rewarded with certificates by the Hon'ble Chancellor- Dr.N Ravi Shankar, Pro Vice Chancellor- Brigadier M. Shrinivasan and Chief Proctor and HOD chemistry- Dr. Naveen Singhal. The Chancellor appreciated all the clubs for their efforts and encouraged them to organize more state and national level events and competitions to provide extensive training in their respective fields and exposure to the students.

Glimpse of the ASSF

FAREWELL PARTY

What goes away as you leave this place, but comes back in memory: The murmur that you hear in libraries or in study groups as people work together in the evening. The sounds of music. The sounds of people talking to their parents on cell phones as they walk through corridors or down the Lawn. The sounds of student life—sorority rush, joining other organizations, being together in the groups that define the community of student existence. The sounds of traffic. The sounds of carols. The sounds of exhilaration at each and every moment. The cheers at games, no matter what the sport. To be completely honest, goodbyes never get easier, no matter how many times you rehearse them.

The final flashes for the college life was experienced with pomp and gala.

The happiness of seeing all of them spreading their wings and flying from their nests did make staff and students nostalgic. Every branch had their own special moments. It might be Mechanical, Electrical, Architecture or B. Pharm, it never mattered as they were collectively united by the name DITians. Time became impertinent as it sped up the events and soon we were at the points of sayonara. The sounds of music and laughter gradually dimmed when the realization of the circumstance hit. It was miserable to see each of them go down different paths while willfully hiding their tears but it was essential. Goodbye seniors.

Yesterday brought the beginning, tomorrow brings the end, though somewhere in the middle we all became a family. A good one.

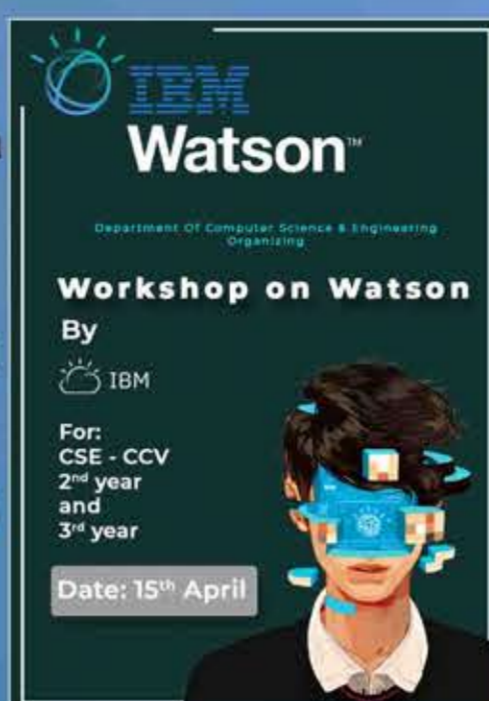

Emotions gathered in one frame

WORKSHOPS

Workshop on Watson by IBM

Department of Computer Science Engineering organised a Workshop on Watson in collaboration with IBM, India at DIT University for the students of CSE-CCV 2nd and 3rd year. Watson is an IBM supercomputer that combines artificial intelligence and sophisticated analytical software for optimal performance as a 'Questionanswering' machine. Workshop took place on 15th April, 2019 in Vedanta Building under the guidance of Dr. Vishal Bharti(Professor &HoD CSE) and Mr. Rohit Kamboj. Students worked on on IBM Watson Developer Cloud where they learnt the exploration and implementation of its services. The main objective is to introduce the world of IBM Watson to the students and make them to realise the importance of automation with the help of technology .

Python seminar with introduction to ML

The coding blocks Club of DIT University had organised a seminar on python with introduction to machine learning on

6th April 2019. The seminar began at 11:00 a.m. and was delivered by Mr RajKumar Saini who is one of the leading programmers in the field of computer science Mr. Raj Kumar Saini started the seminar with a brief introduction on ML followed by the advantages of using python. Machine learning models provide a fast and flexible way to build predictive models of the world and are used for tasks ranging from predicting the supply chain availability to optimising the placement of advertisements. He emphasized on the growing popularity of python, stating that it is a stable programming language with the growing ecosystem used not only by the developers but also by non developers. To put it in business terms, he mentioned the names of companies like Netflix, IBM etc. that work on python. Python also finds application in the field of web development and many mobile applications. Average Python developers salary is relatively quite higher as compared to other programming languages. It is one of the highest programming language in USA with a rate of \$116 379 per year. DIT University looks forward to conduct many more educational seminars like this .

WORKSHOP ON HADOOP

The Department of Computer Science and Engineering organized a workshop on Hadoop. The workshop was conducted from 18th April-19th April '19 for the students of BDA 2nd year and 3rd year . Big Data Analytics with Hadoop is the most sought skill in the software industry today. This workshop was designed to enhance knowledge and skills of the students to become a successful Hadoop developer. In-depth knowledge of core concepts was workshop along with implementation on varied industry use-cases .

Guest Lecture on Understanding Gender for Empowerment and Change: Women, War and Words

In the modern world, it is imperative that we understand the importance of women. Women are, perhaps, the key to the better change of our heavily degraded society.

To promote the above said idea, a guest Lecture was held in the University on 25th March, 2019. The objective of the lecture was to expose students to a variety of issues and interdisciplinary approaches to the study of women, war and gender, encouraging audience participation. This powerful lecture was delivered by Dr. Divya Saksena, Professor and Dean, School of Liberal Arts, IMS University, Dehradun.

The goals of the lecture were:

- To pay attention to gender and women's issues in the modern world.
- To examine representations of women and their condition in films and
- To examine representations of women and their condition in films and media.
- To discuss how gender intersects with cast, ethnicity, religion, age, economics, psychology and other areas of experience.

The person behind the successful lecture held

Maybe I lost myself with you

I have loved you more than my life itself,
In this journey of losing oneself.
But world started spinning in wrong direction,
I felt alone and wanted affection.
I wanted to cry, I wanted to scream,
But no one can see my hollow tears.
Shall I fall like an autumn leaf,
From deep sorrow and painful grief?
But lately I cry to myself.
Did I leave myself behind in those books
Or shows at cinema?
In our favourite lonely coffee shops?
Or those crowded concert halls!
Cursed by the change,
Hidden by your lies,
Slowly my love now dies.
The scars will always be there,
Yet to be vanished.
Not to be repaired.

Angel Of Destruction

We all are making up
This sphere into a place
Where inside masses
There's a beast in a cave
Which gets out invariably
No beam in its face.
Where Mind is trembled
For the love that is fake
Picks up fight with mother
When no one else to blame.
Where Everyone's holding up
Hiding Mistake they had made
Littering around their thoughts
Free tenant to this place.
Where Lies and ruses are taught
Children copying on to slates,
Where Money has bought religion
Slinging Hearts of their mates,
Where Sins are depicted as deeds
All the stale Blood fades,
Where White coloured soul
Getting dark with the age,
Now that the Time is slipping
Hope would not come this day,
Feared to be a monster
Too cold to be brave.
So who requires angel of destruction
To end up this world's fate?
Well we already have enough ego,
And enough revenge seeking hate.
